**POISON**

**KEEP OUT OF REACH OF CHILDREN. READ SAFETY DIRECTIONS AND WARNINGS OR USING PRODUCT.**

**ACTIVE CONSTITUENT:** 990 g/kg ALPHACHLORALOSE

**METHOD OF TOXICITY:** 

Very dangerous. Poisonous if swallowed. Do not allow treated grain seed to contaminate grain/other seed intended for animal or human consumption. Undertake baiting if non-target species are likely to feed on the bait in significant numbers.

**SAFETY DIRECTIONS:**

- Do not contaminate the immediate human or animal environment with bait.
- Use only in the control of pigeon (**Passer domesticus**)
  - and sparrow (**Passer montanus**)

**DOMESTIC & INDUSTRIAL AREAS:**

- Place bait on the ground or on surfaces that animals can reach. Do not use baiting boxes or feeders.
- Place bait in feeding areas or baits stations.
- Place bait in areas where the area is inaccessible to non-target species.
- Mix 50% poisoned seed with 50% untreated grain and place in feeding area. The addition of untreated grain prevents sparrows from ingesting too much toxin too quickly.

**COMMERCIAL & AGRICULTURAL AREAS:**

- Place bait on the ground or on surfaces that animals can reach. Do not use baiting boxes or feeders.
- Place bait in feeding areas or baits stations.
- Place bait in areas where the area is inaccessible to non-target species.
- mix 50% poisoned seed with 50% untreated grain and place in feeding area. The addition of untreated grain prevents sparrows from ingesting too much toxin too quickly.

**GENERAL INSTRUCTIONS FOR USE**

Prior to baiting:

- The feeding birds list starting with the baited seed is essential. Use the same material for pre-feeding as will be used in the operation. Prior to baiting calculate the amount of bait that will be required to allow the theoretical capture of all birds in the flock. Constant supervision must be maintained at all times during baiting.

- Baiting should commence at first light (early morning). Baited grain/seed should be exposed for ½ to 1 day only and then withdrawn and free feed substituted. Apply 10 g baited wheat per pigeon or 1 g baited seed per sparrow

- Baiting should occur where non-target species will not be exposed to the bait. Baiting must be dry. Product to be disposed is to be placed into heavy-duty garbage bags, sealed with nylon cable ties and disposed of by burial at a local authorised landfill. Burial should be sufficient to ensure that scavenging birds cannot readily access the bait.

- The bags of dead birds must be buried to prevent access by predatory birds and other animals (e.g. dogs, foxes).

**DISPOSAL OF BIRDS**

- All affected birds must be immediately collected and euthanized humanely and then placed in garbage bags for disposal. Birds are to be disposed of through appropriate waste disposal methods. Birds are to be disposed of in a landfill/tip. The bags of dead birds must be buried to prevent access by predatory birds and other animals (e.g. dogs, foxes).

**REMOVAL AND DISPOSAL OF USED PRODUCT**

- The product must be disposed of safely and only to authorised persons. Each State and Territory has its own specific regulations for the disposal of pesticides. The International Agency for Research on Cancer has declared Alphachloralose to be carcinogenic. This decision must be considered in an adverse press. the use of the product must be notified the appropriate State or Territory authority to enable the control and cease that the State or Territory control of use legislation is adhered to.

- The product must be disposed of in a landfill/tip. The bags of dead birds must be buried to prevent access by predatory birds and other animals (e.g. dogs, foxes).

**DO NOT USE FOR ANY PURPOSE OR IN ANY WAY, CONTRARY TO THIS LABEL.**

**NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL.**
PRECAUTIONS
Alphachloralose is a stupefying agent and should be handled accordingly. During periods when birds are feeding on bait keep extraneous noise to a minimum as birds become very sensitive. Baiting with Alphachloralose is more effective when ambient temperature is neither high nor low.

PROTECTION OF LIVESTOCK
DO NOT place bait in a location which is accessible to domestic animals or livestock.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT
Highly toxic to birds. DO NOT use product in areas where native birds are likely to come into contact with product.

Dangerous to fish. DO NOT contaminate streams, rivers or waterways with the product or used container.

STORAGE AND DISPOSAL
Store in the closed, original container in a cool, well-ventilated area. DO NOT store for prolonged periods in direct sunlight. Rinse containers before disposal. DO NOT dispose of undiluted chemical on site. If recycling, replace cap and return containers to recycler or designated collection point. If not recycling, break, crush or puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available turn the waste into the soil by burying it 500 mm below the surface in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots, in compliance with relevant Local, State or territory government regulations. DO NOT burn empty containers or product.

SAFETY DIRECTIONS
Very dangerous. Poisonous if swallowed. When preparing product for use allow excess to blow off hands and after each baiting, wash thoroughly with soap and water. After each day’s use, wash gloves and contaminated clothing.

FIRST AID
If poisoning occurs get to a doctor or hospital quickly. Avoid giving alcohol.

MSDS
Additional information is listed in the Material Safety Data Sheet available from the supplier.

CONDITIONS OF SALE:
Subject to the Trade Practices Act 1974. The manufacturer’s liability for any damage, loss or injury howsoever caused arising out of the use of this product shall be limited to the replacement of any defective product, supply of equivalent goods or payment of the cost of the replacement of the defective product. This product is sold subject to conditions of sale endorsed on the label. APVMA Approval No.: 00/24/5227

ALDI Alphachloalose Bird Control
FLAT SIZE: 420MM WIDE X 70MM DEEP – FOLDS TO: 120MM WIDE X 70MM DEEP
